WORK EXPERIENCE

Java Full Stack Developer

Besant Technologies July 2023 - Present

Online Dictionary App Jul 2023 - Aug 2023

<https://arivukkarasik.github.io/dictionary/>

Technology Used: HTML, CSS and JavaScript

Online Dictionary Application is a web-based tool designed to provide users with definitions. This application leverages a sleek, user-friendly interface built with HTML and CSS, while the functionality and interactivity are powered by JavaScript. The project submitted by Besant Technology

Online Quiz Application

Sep 2023 - Oct 2023

<https://arivukkarasik.github.io/quiz/>

Technology Used: HTML, CSS and JavaScript

The Online Quiz Application is a web-based tool designed to provide users with an engaging and interactive platform for taking quizzes on various topics. This application features a clean and intuitive interface built with HTML and CSS, while JavaScript handles the functionality and interactivity, including quiz logic, scoring, and real-time feedback. The project was delivered by Besant Technology.

Diet Tracking Application

Nov 2023 - May 2024

https://arivukkarasik.github.io/Diet_tracker/

Technologies Used: Mysql, Java, Spring Boot, Rest API, JavaScript, React js

Backend Development

- In MySQL, Tables for users, meals, nutritional information, and goals and also relationships and constraints to ensure data integrity.
- In Spring Boot, RESTful APIs for user authentication, meal logging, and goal tracking and Controllers, services, and repositories to handle business logic and data persistence.
- In REST APIs, Endpoints for CRUD operations (Create, Read, Update, Delete) related to users, meals, and goals and JSON responses for easy integration with the frontend.

Frontend Development

- In HTML and CSS, Structure and styling of the application and Responsive layout for different screen sizes.
- In JavaScript, Client-side logic for dynamic content updates and Fetch API for making HTTP requests to the backend.
- In React, Component-based architecture for building interactive user interfaces and Routing for navigation between different views (e.g., login, dashboard, meal logging).
